Commercial

project

Site IAG Insurance Australia Group
Address Pirrama Road Pymont
Client Vos Group Engineers

the requirement

To provide underbench compact chilled and boiling water systems without unsightly kitchen cupboard door vents in this brand new office building.

the clearwater solution

Supply and install multiple Billi Trio 960 Models. The clever re-use of the latent heat extracted during the refrigeration process is used to pre heat the boiling water chamber providing for excellent energy efficiency and this avoids the need for large door vents necessary with competitor units.
